EXPERIENCE

WCRS, U.K - *Lead Developer*

Feb 2013 - Nov 2018, Mar 2019

- Developed and maintained web pages, for the world's largest technology company, which was available in 27 languages, and over 60 countries throughout Europe, Africa and Middle East

- Provided a seamless experience browsers and devices through compliant and responsive HTML, CSS, and ES6 Javascript

- Utilised command line versioning - Git and SVN

- Reduced repeating tasks such as minification, linting and compiling Handlebar templates by using NPM scripts and Gulp

- Focused on accessibility for a wider audience including screen readers, reduced motion and increased contrast

- Maintained a high level of production to ensure approval with quality assurance, accessibility and analytics teams

- Reviewed peers code - providing constructive feedback resulting in team-wide consistent code and reduced mistakes

- Developed tools to help enhance workflow for developers and project managers therefore lowering QA tickets

- Collaborated with a multitude of internal and external teams

- Managed projects from concept to live

- Provided updates to existing projects after release

- Knowledge in Photoshop - ability to produce graphics, understand PSDs and export assets

- Managed a small team of 6-8 and designated required resources

- Trained and supervised new developers, also coached current staff in advanced processes

- Anticipated fallbacks during projects and provided updated timings

- Measured and assessed colleagues for strengths and weaknesses to feedback to higher management
- Maintaining professionalism whilst working closely with clients
- Thrived in a high-pressured and fast-paced environment with confidential restrictions

- Overseas travel for up to 25 days
- Planned team events and parties
- Fire marshal

UVd, U.K - *Front-end developer/designer*

Sep 2012 - Nov 2012
- Enhanced hand-over procedure between design and development team
- Helped create brand guidelines for clients to ensure consistency throughout all marketing materials
- Influenced new projects and their final outcome with colleagues

Pixeled Eggs, U.K *- Interactive developer*

Jul 2012 - Sep 2012
- One of two first employees for the company
